**RELEASE DATE: IMMEDIATELY**

**Terra Sonic Opens New Office in Charlotte, North Carolina**

Marietta, Ohio, USA...Terra Sonic International, a provider of Sonic Drilling Services and an industry leader in the manufacture of Sonic Drill Rigs, has opened a new North Carolina office in the Charlotte area.

Terra Sonic has been offering Sonic Drilling Services from its former Raleigh location since 2013. While the Raleigh office will remain as is, the addition of the new Charlotte facility completes the integration of Terra Sonic with Probe Technology who was acquired in January 2015. The facility is located in Midland, North Carolina, just outside of Charlotte, and will provide for more office space as well as a larger yard for the combined fleet of sonic and direct push rigs necessary to meet the growing demand for Terra Sonic International's Drilling Services.

"We are really excited about this expanded facility," said Chris Schappell, Charlotte Branch Manager. "This will allow us to better serve our customers in the region with the newest, most advanced Sonic Rigs in the industry as well as the direct push drilling services they had come to rely on from Probe Technology."

Terra Sonic International is committed to exceeding customer expectations and continues to build on its solid reputation of utilizing reliable state of the art equipment, completing projects on time and on budget, and operating safely and professionally.

Headquartered in Marietta, Ohio, Terra Sonic International also has regional offices in Aiken, South Carolina; Memphis, Tennessee; and Orlando, Florida. To learn more visit [www.terrasonicinternational.com](http://www.terrasonicinternational.com).
